M. Testimonials

As all family businesses grow, especially in times of crisis, they need to restructure, implement workflows & clear reporting procedures, and have a clear vision of the financial impact of each decision they make. For this to work, the data going in the system has to be clean, accurate, and on time. The ERP needs to be updated so it can meet the new business' requirements. Employees need to be trained and someone needs to audit all these changes and make sure they are well implemented. Making sure this is all being done while managing a crisis such as the one we are facing in Lebanon seemed like an impossible task. The team of M-Consultants helped us through this phase and took care of all these tasks right away. Michel helped us implement everything we had in mind for the structure of the company. The team took care of the back end work and trained the employees, guiding them through this change. The results are already so relevant to the company. We realized the value of having people such as Michel taking care of this to help us make the right decisions during these times. I would definitely recommend them to any management team if they want to be able to have a clear financial structure and vision of their business."

On the whiteboard, there is a line graph with several yellow circular data points connected by a yellow line, and a large yellow arrow pointing upwards and to the right. The background is a bright, slightly blurred office setting.
